Sequence 4, Application US/09061709B

| Patent No. 6297364
| Patent No. 6297364
| GENERAL INFORMATION:
| APPLICANT: Chen, Yao-Tseng
| APPLICANT: Gure, Ali
| APPLICANT: Stockert, Elisabeth
| APPLICANT: Stockert, Elisabeth
| APPLICANT: Stockert, Elisabeth
| APPLICANT: Stockert, Elisabeth
| APPLICANT: Stockert, Elisabeth
| APPLICANT: Old, Lloyd J.
| TITLE OF INVENTION: Isolated Nucleic Acid Molecules Encoding Cancer Associated
| APPLICANT: Old, Lloyd J.
| TITLE OF INVENTION: Antigen, The Antigens Per Se, And Uses Thereof
| PILE REFERENCE: LUD 5538
| CURRENT APPLICATION NUMBER: US/09/061, 709B
| CURRENT FILING DATE: 1998-04-17
| NUMBER OF SEQ ID NOS: 8
| SEQ ID NO 4
| LENGTH: 4159
                            1549
                                                                                                                           1609
                                                                                                                                                                                1536
                                                                                                                                                                                                             402
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      162
